

Geniatech Android 2.3 20120111 Version Upgrading Instruction

1. Download firmware from
<http://www.geniatech.com/down-eng/Androidtvbox/update20120111.zip>
2. Copy the file into SD card, **don't unzip, change the file name/format to update.img**, all are small characters. Please note you did not hide filename extension on your pc.
3. Plug SD card into the box, go to setting->privacy->update system to update new firmware directly.

You also can use USB disk to update, here is steps:

A: Download and copy the file into USB disk, **don't unzip, change the file name /format to update.img**, please note you did not hide filename extension on your pc.

B: Connect USB disk to the box, then, press the update/reset button on the bottom, and plug in power adapter at the same time, hold some seconds, it will update automatically, release the button and the box will restart after finished.

Improvements:

1. Fixed jerky boot screen
2. Improved the Youtube video playback, 1080P videos work more smoothly.
3. Improved the local videos playback with video player.
4. Adding CVBS resolution output in setting as default(For the model with CVBS port)
5. Modified online update function. Update later firmware from internet directly is possible.

Note:

1. Update this firmware version base on previous any android 2.3(SPI must be 20111102) version directly is possible.
2. If your current firmware version still is android 2.2, please check below to update to this version
A: Check the android 2.2 SPI is 20110907 version or not (Uboot number is 20110906, recovery number is 20110907).
B: Update android 2.3 SPI to 20111102 this version.
C: Update this firmware version.
3. Latest HiDTV software download link for ATV2000. The version is HiDTV1.9.2.
<http://www.geniatech.com/down-eng/Androidtvbox/HiDTV1.9.2.zip>
Download and unzip it, you will find HiDTV1.9.2.apk.
